Work Experience

FullStack Developer
Dantechnology | Design and creation of evaluation system
May 2023 to August 2023.
Responsabilities:
- During my participation in the "Odair" project, I played a crucial role as the person responsible for developing the page layout and resolving errors.
- This project aimed to create an online platform specialized in the personalized generation of questionnaires, tests or evaluations.

Tech stack:
Html 5, CSS 3, PHP, SQL, Codeigniter, Boostrap 5
Tools:
Code: Visual Studio Monitoring Platform: Jira

FullStack Developer
Universidad tecnológica de Manzanillo (Utem) | Design and creation of survey system
January 2021 to April of 2021.
Responsabilities:

- I took responsibility for the development of the main views and questionnaires of the system.
- My main task was the creation of meaningful interfaces that made it easier for students to express their opinions through satisfaction surveys.

Tech stack:
Html 5, CSS 3, PHP, SQL, Boostrap 5
Tools:
Code: Visual Studio Monitoring Platform: Jira

Relevant Skills

- HTML, CSS, PHP, SQL, Next.Js
- Front End & Back End Coding
- Problem solving, teamwork, communication and time management.

Languages

- Spanish
- English

Hobbies

In my free time I really like to play and spend time with my friends as well as studying a programming language or a library.

FullStack Developer
Dantechnology | Interactive map creation evaluation system
January 2024 to April 2024.
Responsabilities:

- During my participation in the project "Design and implementation of the Colima field website: improving data visualization for farmers", I collaborated in the development of a web page dedicated to the visualization of agricultural data in the state of Colima.
- My contribution focuses on the frontend, where I was involved in creating and fine-tuning various screens and views.

Tech stack:
Html 5, CSS 3, PHP, SQL, Codeigniter, Boostrap 5
Tools:
Code: Visual Studio Monitoring Platform: Jira
